... the pride of Door County, Wisconsin

WHOLESALE BUYERS

The Home of Cherry De-Lites,

Wisconsin's finest, red tart dried cherries.

Door County is a world renown tourist area. Visitors revel at the beauty of the May cherry blossoms and the red splendor of fruit throughout the harvest days of August. The orchards of Door County are located in the fields and on the bluffs of the limestone, Niagara escarpment protected by the surrounding waters of Lake Michigan and the Bay of Green Bay. This unique climate and geographic location produces the finest, most flavorful red tart cherry in the U.S.A., perhaps the world.

Country Ovens has been producing Cherry De-Lites since 1987. The dried red tart Montmorency cherry is unsurpassed for its quality and flavor. Cherry De-Lites are all natural, made exclusively from premium Grade 'A' fancy cherries. There are no artificial colors or preservatives added.

Country Ovens enhanced our Cherry De-Lite line of products with the addition of other natural, premium, mid-western dried fruits. We are now your supplier for all your dried fruit needs.

Our factory is located in the heart of rural southern Door County. Our products are our reputation. Their quality has no equal. Established markets, for our unique fruit, are now worldwide.

Cherries For Your Health...

According to research, tart cherry products (i.e. dried cherries, cherry juice) may be ten times stronger than Aspirin or Ibuprofen relieving arthritic pain. They are an excellent source of powerful antioxidants which may help fight cancer, heart disease and other illnesses.
